^{1/} State agriculture export estimates, except 1999 nursery products, are based on the assumption that if a state's production comprises a certain percentage of the total U.S. production for a given commodity, except as otherwise noted, it receives the same percentage in export revenues. This assumption will hold true for some commodities more than others. Industry estimates are that roughly 40% of Oregon's production is exported out of the country and 80% is exported out of state.

^{2/} Product of cash receipts and the Oregon Wheat Commission estimate of exported wheat (75%).

^{3/} Nursery products from OASS Survey of Nurseries for calendar year 1999.

^{4/} OASS price multiplied by export tonnage from Oregon Hazelnut Commission.

^{5/} OSU sales prorated by export data from OASS 2001 Christmas Tree Survey.

^{6/} Fish & products are not included and are only available on a Northwest Port basis from the U.S. Department of Commerce. Includes confectioneries, also greenhouse products for 1998 and 2001, and Christmas trees for 1998, 1999, & 2000.
